The research area is located in Çatalca-Kocaeli part of Marmara Region, European side of İstanbul, within the boundaries of İstanbul Metropolitan Municipality. Until the last 25-30 years, there was vegetable (crop) production in Bağcılar where the %72 of the land was arable and people were selling their production and dealing with animal breeding in order to live on. The industrialization movement, initiated the establishment of factories in the district in the years of 1956, 1959, 1962, developed rapidly in parallel with development in the industrialization and open economy in Turkey after 1980's. Bağcılar district which is the part of İstanbul, being the most significant province with regard to development and sophistication, keeps more than %5 of the industrial facilities within its boundaries. Bağcılar district is among the top five districts, where is an intensive industry. By the year 2010, there are 710 industrial facilities registered at the İstanbul Chamber of Industry in Bağcılar. The majority of these facilities are in Bağcılar, Evren, Mahmutbey and Güneşli neighborhood that makes up of Western part of the district because of the E-5 highway.
