The world's population approximately 15% is composed of people with disabilities. The disabled population rate is estimated increase over time. In the world made legal arrangements for disabled and is carried out with various time, the common point of all the legal regulations have been full and equal benefit of people with disabilities from the fundamental freedoms and human rights. All individuals in society should benefit to tourism activities that is a right of people. Therefore, promoting the participation of those who can not trip tourism because of any obstacle is so important. In this regard in the world very few work done which requires special equipment and services for the disabled accommodation. As a result of this study, a detailed literature survey conducted on people with disabilities in tourism sector in the world and in Turkey, with this sharing studies are intended to provide direction to the work that will be done later.
