The most important issue for the development of entrepreneurship is the establishment of a healthy entrepreneurship ecosystem. The formula for the healthy establishment of entrepreneurship ecosystem in our country is based on the fact that state, private sector and non-governmental organizations are united and support each other for the same purpose. The strengthening and widespread entrepreneurship is possible with the presence of a robust ecosystem. When countries where entrepreneurship is widespread are examined, a great deal of attention is given to the importance and support given to the entrepreneurship ecosystem. The ecosystem experience in these countries, know-how is quickly shared and turned into benefit. In this context, entrepreneurship ecosystem in Turkey yet to have a new ecosystem is forming and growing in a healthy manner is crucial contribution that the private sector offers.

In the first part of this study, the definition of entrepreneurship, its importance, its functions and the situation in our country are emphasized. In the second part, the concept of entrepreneurship ecosystem is discussed, elements of ecosystem and its importance are given. In the third part, the support provided by the Turkish Economy Bank for entrepreneurs was mentioned, and the result was completed.
